1. Introduction

This is our first group work that was assigned to us by the module "Introduction to Information Systems" with the objective to utilize the standard language (HTML, CSS, JavaScript) for designing and developing an e-commerce website that sells various grocery items.

1.1. Introduction to the project

This e-commerce website was made with the use of HTML, CSS, and JavaScript. There were different requirements for the web pages to be included in this website. Those required web pages are Home page, Blog page, Products page, Research page, and About Us page.

HTML stands for Hyper Text Markup Language. It is the standard markup language used to create web pages. HTML is a combination of Hypertext and Markup language. Hypertext defines the link between web pages. A markup language is used to define the text document within the tag to define the structure of web pages. (Geeksforgeeks, 2024)

CSS (Cascading Styling Sheet) is the language that defines the presentation of a document written in a markup language like HTML. CSS is the language that transforms a basic HTML structure into a user-friendly and visually beautiful webpage. It can change the font, colour, size, and spacing of content, split it into multiple columns, or add animations and other features. (Geeksforgeek, 2024)

JavaScript (js) is a light-weight object-oriented programming language which is used by several websites for scripting the webpages. It is an interpreted, full-fledged programming language that enables dynamic interactivity on websites when applied to an HTML document. (Javatpoint, n.d)

Rohan Shrestha

1.2. Goals

The main goal of our coursework is to create an E-commerce website for grocery items that sells various kinds of organic products.

1.3. Objectives

The main objectives of our website are as follows:

- To offer variety of organic fruits and vegetables.
- To offer images of products for customer's ease.
- To gather customer's feedback.
- To offer a user-friendly look of the website.

1.4. Use of HTML, CSS and JavaScript

HTML, CSS and JavaScript, all three have been used in various ways in our website. HTML has been used to display contents in the web pages, CSS has been used to add different styling to the web page and JavaScript has been used to add various functionality. CSS has been applied in all three ways which are inline, internal and external CSS. Whereas, JavaScript has been used in two ways which are internal and external JavaScript.

Incline CSS had been used to overwrite the internal and external CSS. Internal CSS has been used where the same codes of CSS can not be used in any other web pages. Similarly, external CSS has been used when the same codes of CSS was needed in many web pages. For the internal and external JavaScript were used in the similar way to that of CSS.

HTML, CSS and JavaScript have all been used and put together to develop a complete website. These all make the website well-functioning and neat. Each web pages use HTML and CSS, but JavaScript is used only where it is necessary.

Rohan Shrestha

1.5. Verdict

This coursework was made possible with the help and equal support from all the members of the group. The group project made everyone's ideas compile into one website and the outcome is quite satisfactory. The website has various JavaScript functions that makes a huge difference in the functionality of the website. The design of our website is made to look simpler and neat.

All of the team members learnt a lot about HTML, CSS and JavaScript and it's use while making the website. The members also learnt about file management while developing this website. The project enabled every member of the team to expand their knowledge about web-development. The group coursework in our opinion was a great success.

2. Discussion and Analysis

2.1. Selected Text Editor: Visual Studio Code

Visual Studio Code (famously known as VS Code) is a free open-source text editor by Microsoft. VS Code is available for Windows, Linux, and macOS. Although the editor is relatively lightweight, it includes some powerful features that have made VS Code one of the most popular development environment tools in recent times. (Educative, n.d)

The reason for choosing Visual Studio Code as the text editor is because of the flexibility and multiple option of utilizing various compilers and extensions which made the coursework easier as we were able to detect many errors. It saved a lot of our time to edit the code for our website. Visual Studio Code is a powerful with great debugging and editing experience. It has many different features that helped us improve our website without facing many problems. This made us choose Visual Studio Code as our text editor.

Rohan Shrestha

2.2. Tool used while developing wireframe: Balsamiq

Balsamiq Wireframes is a user interface design tool for creating wireframes. We can use it to generate digital sketches of your idea or concept for an application or website, to facilitate discussion and understanding before any code is written. The completed wireframes can be used for user testing, clarifying your vision, getting feedback from stakeholders, or getting approval to start development. (Balsamiq, n.d)

There were many different tools for creating wireframes but Balsamiq was selected for creating wireframes of our website as it was the requirement of the coursework. It was used to generate the website layout quickly which was really helpful for the better understanding of the website before it's creation. Balsamiq has been used in this coursework and to present a template or blueprint of the actual website.

2.3. Name of the pages

2.3.1. Home Page

Home page is the main page of the website. The home page contains a navigation bar, a main section and a footer. The navigation bar allows to go through other web pages of the website, the main section contains all the description of other web pages present in the website. The footer also allows to navigate to some other pages along with a section containing phone number and social medias of the website. Home page shows some of the most popular products and the latest blog.

Rohan Shrestha
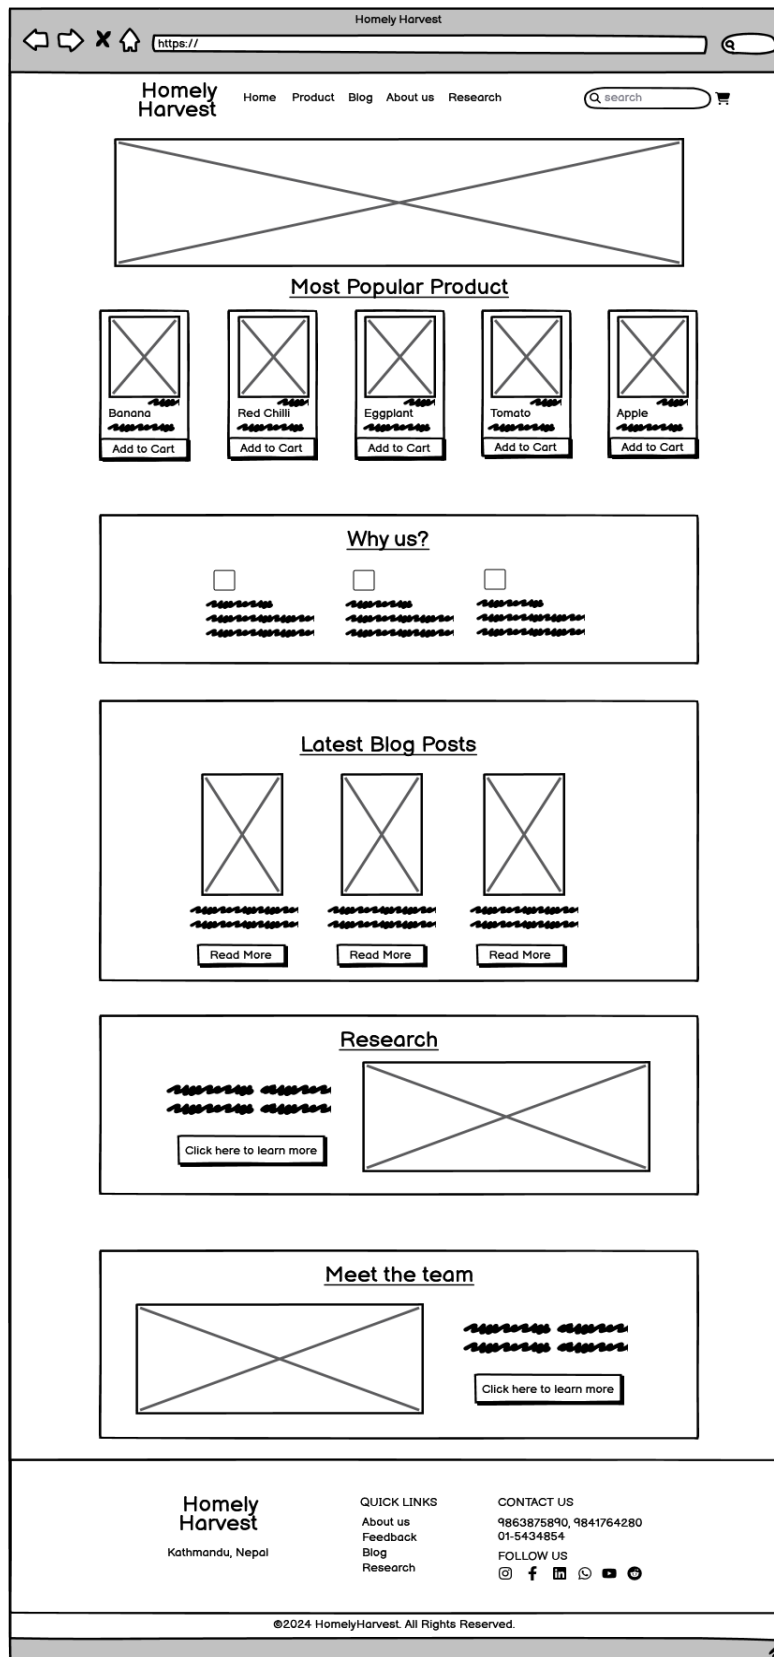

Figure 1: Wireframe of Home page
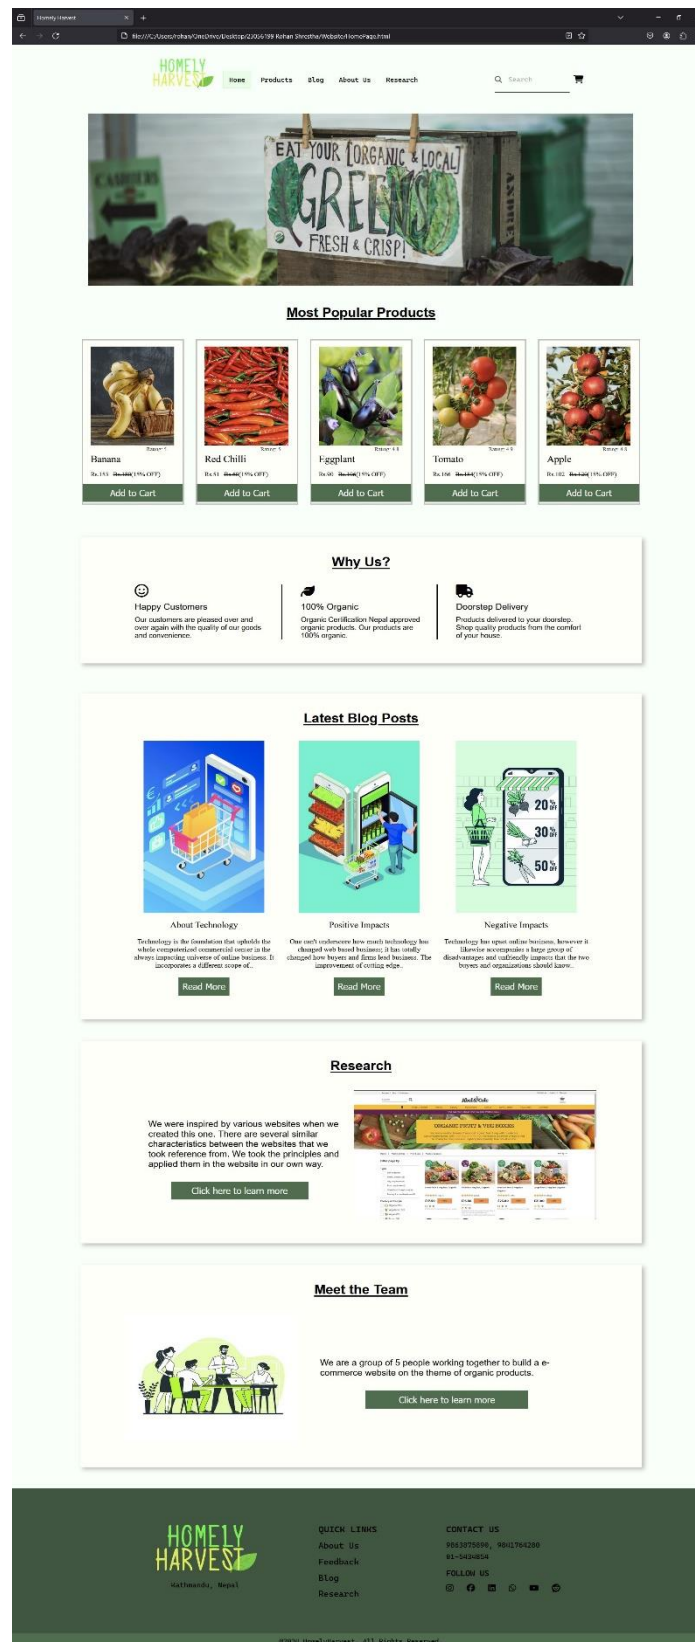

Figure 2: Screenshot of Home page

2.3.2. Product page

The products page contains the navigation bar and the footer as that of the home page. Products page contains a headline that display the on-going sale and there is a discount of 15%. Then there is another headline banner displaying an image with a quote that reflects the organic theme we chose for our website. Then there are the products with their own images, names, actual price, discounted price and rating. There are five products in a row and ten items each in the sections of fruits and vegetables.

Rohan Shrestha
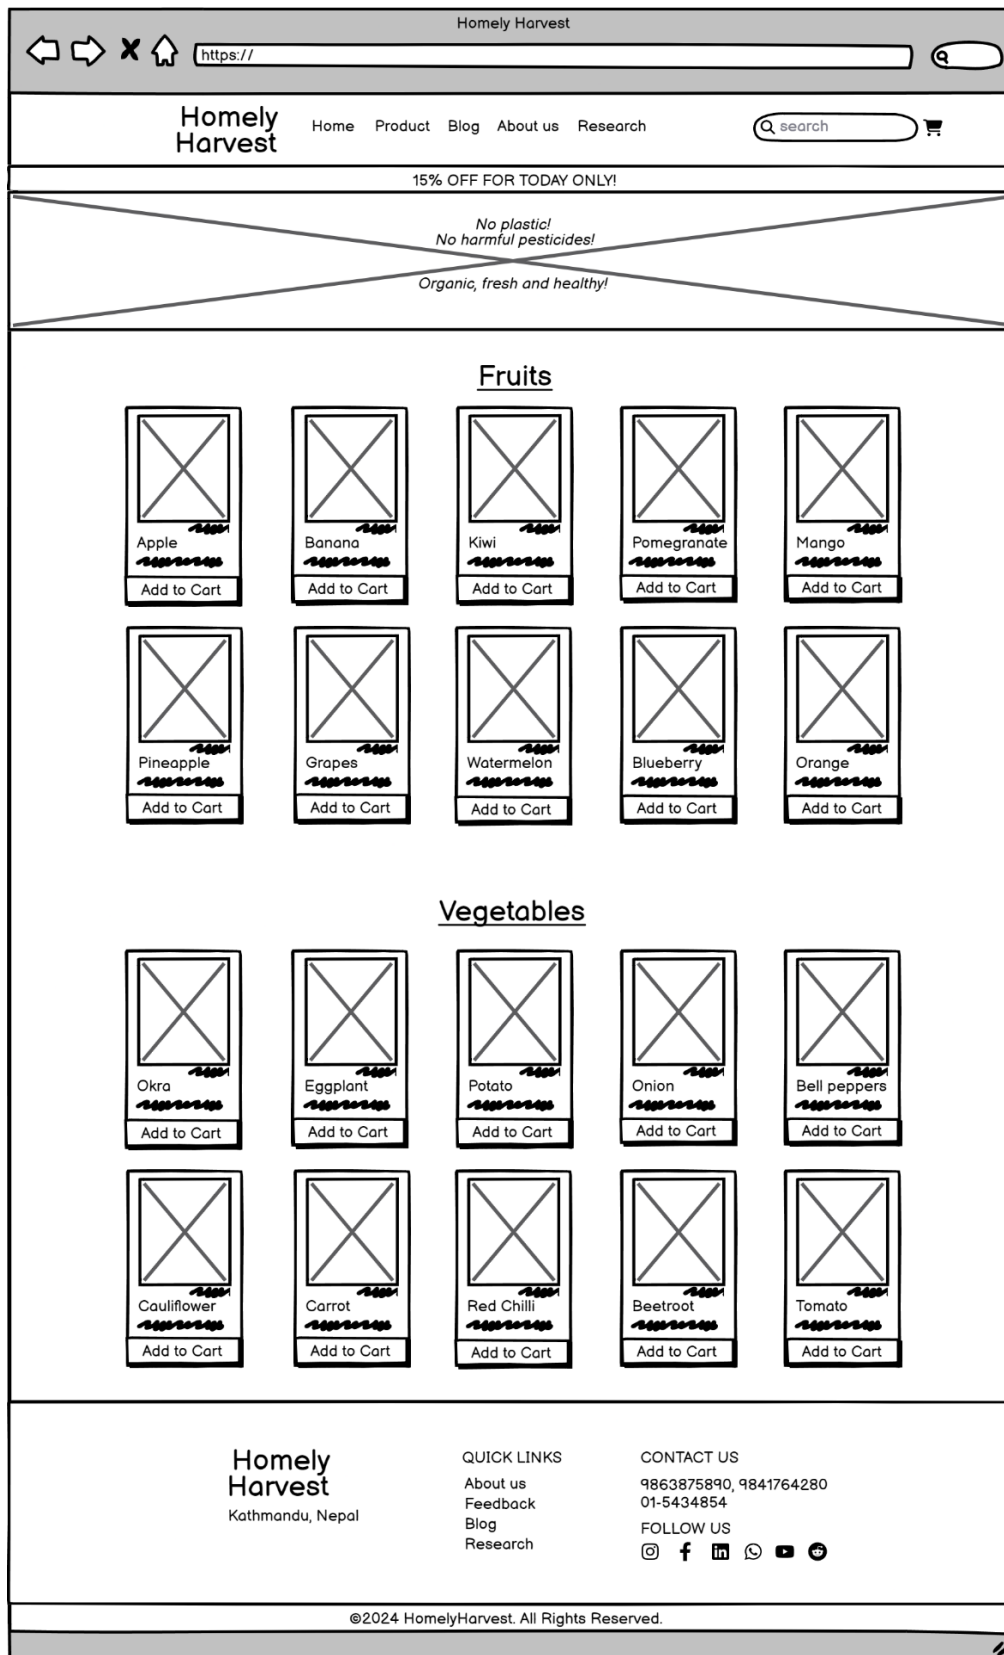

Figure 3: Wireframe of Products page

Rohan Shrestha

Figure 4: Screenshot of Products page

Rohan Shrestha

2.3.3. Blog page

The blog page contains the navigation bar and the footer as that of home page in the main section of the blog, there is a heading that welcomes the customer to the blog page and immediately starts with the first blog. There is a total of 5 different blogs. The blog is on the topic "What is technology?, positive and negative impacts of technology, effects of technology on our lives" with 5th blog containing conclusion. We also used java script to display day, date and time at the top left part of the blog.

Rohan Shrestha

Figure 5: Wireframe of blog page

Rohan Shrestha
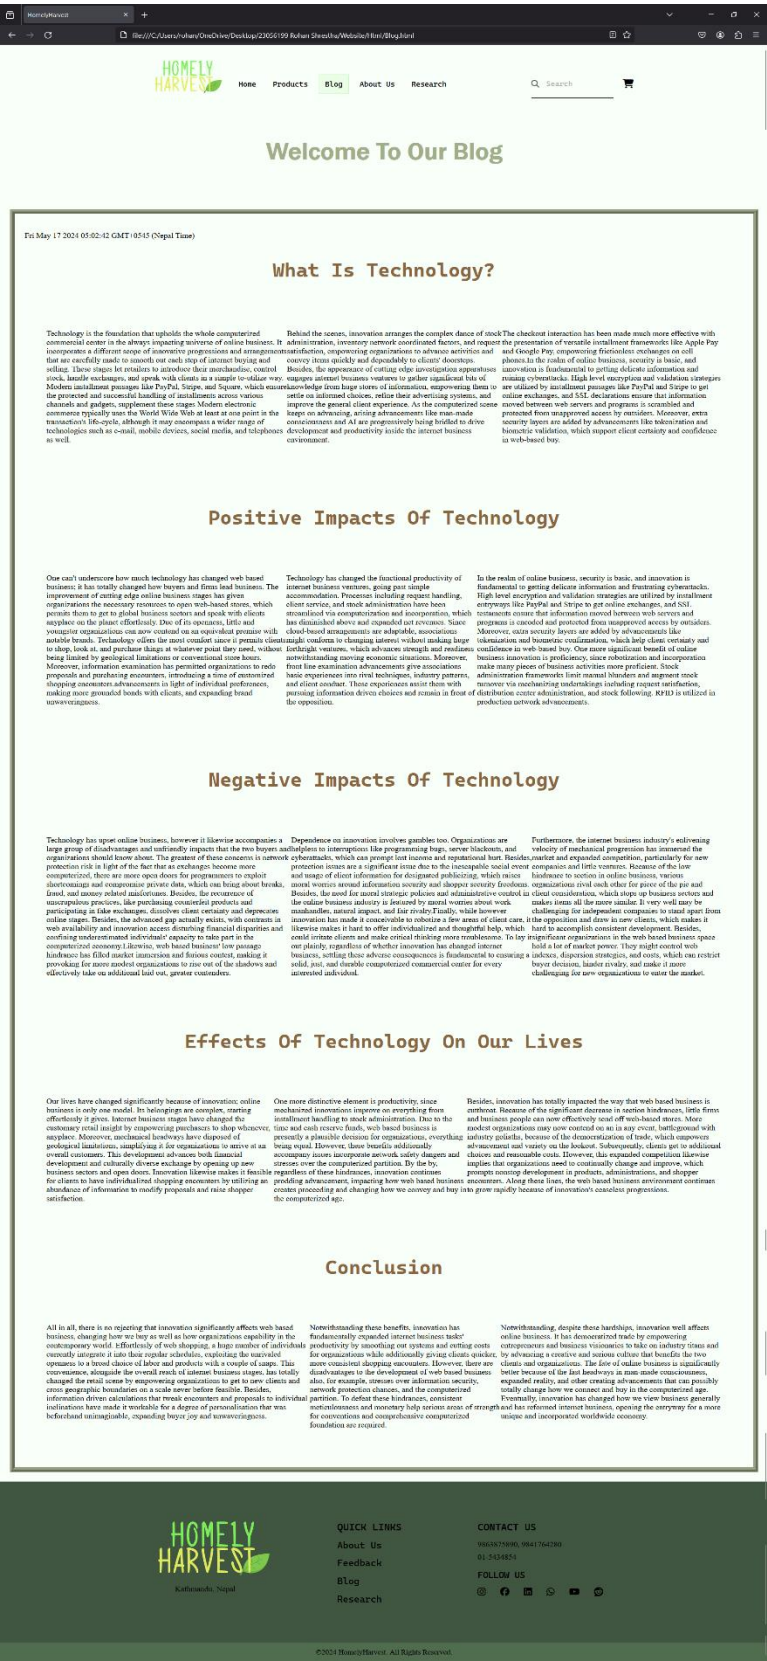

Figure 6: Screenshot of Blog page

Rohan Shrestha

2.3.4. About Us page

The About US page contains the navigation bar and the footer as that of the home page. In the main section of the about us page contains the images of the members which are linked to their individual portfolio.

Figure 7: Wireframe of About Us page
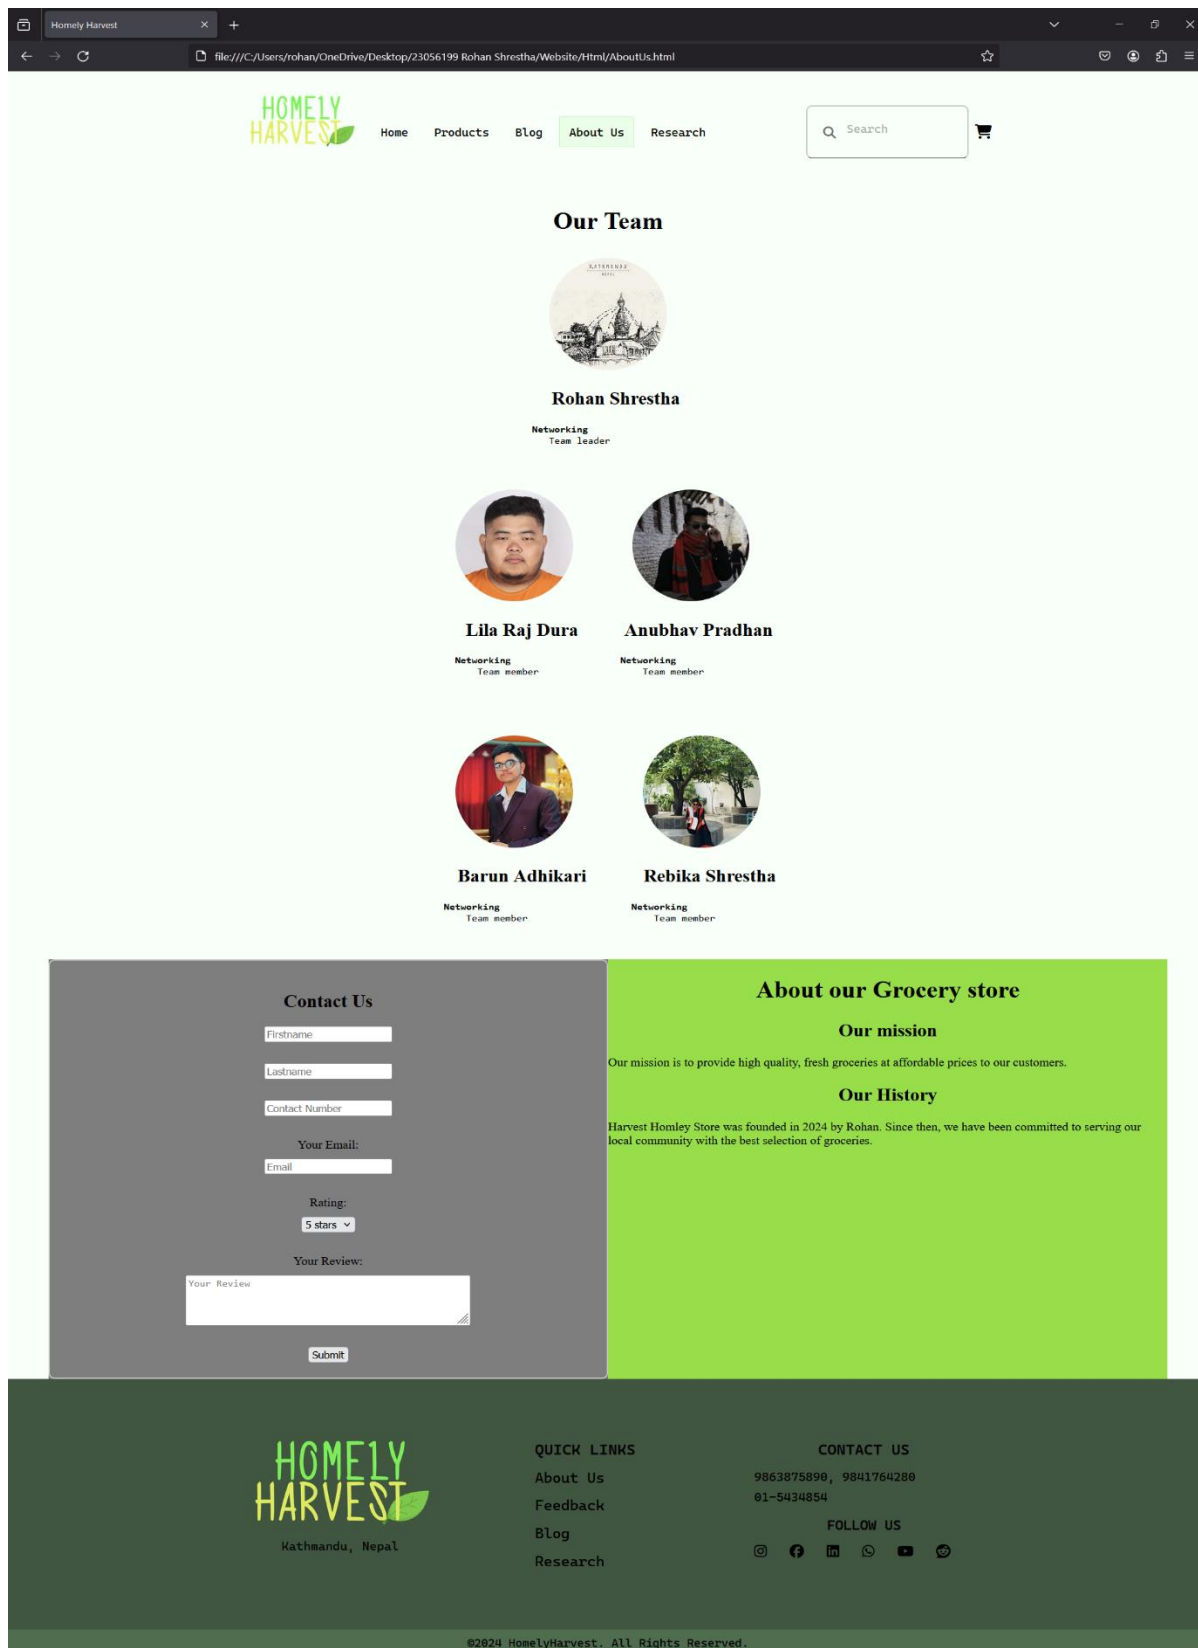

Figure 8: Screenshot of About Us page

2.3.5. Research page

The research page contains the navigation bar and the footer as that of the home page. In the main section of the research page, the websites from which the references were taken are present. There is also a small description of the reference website along with the images.
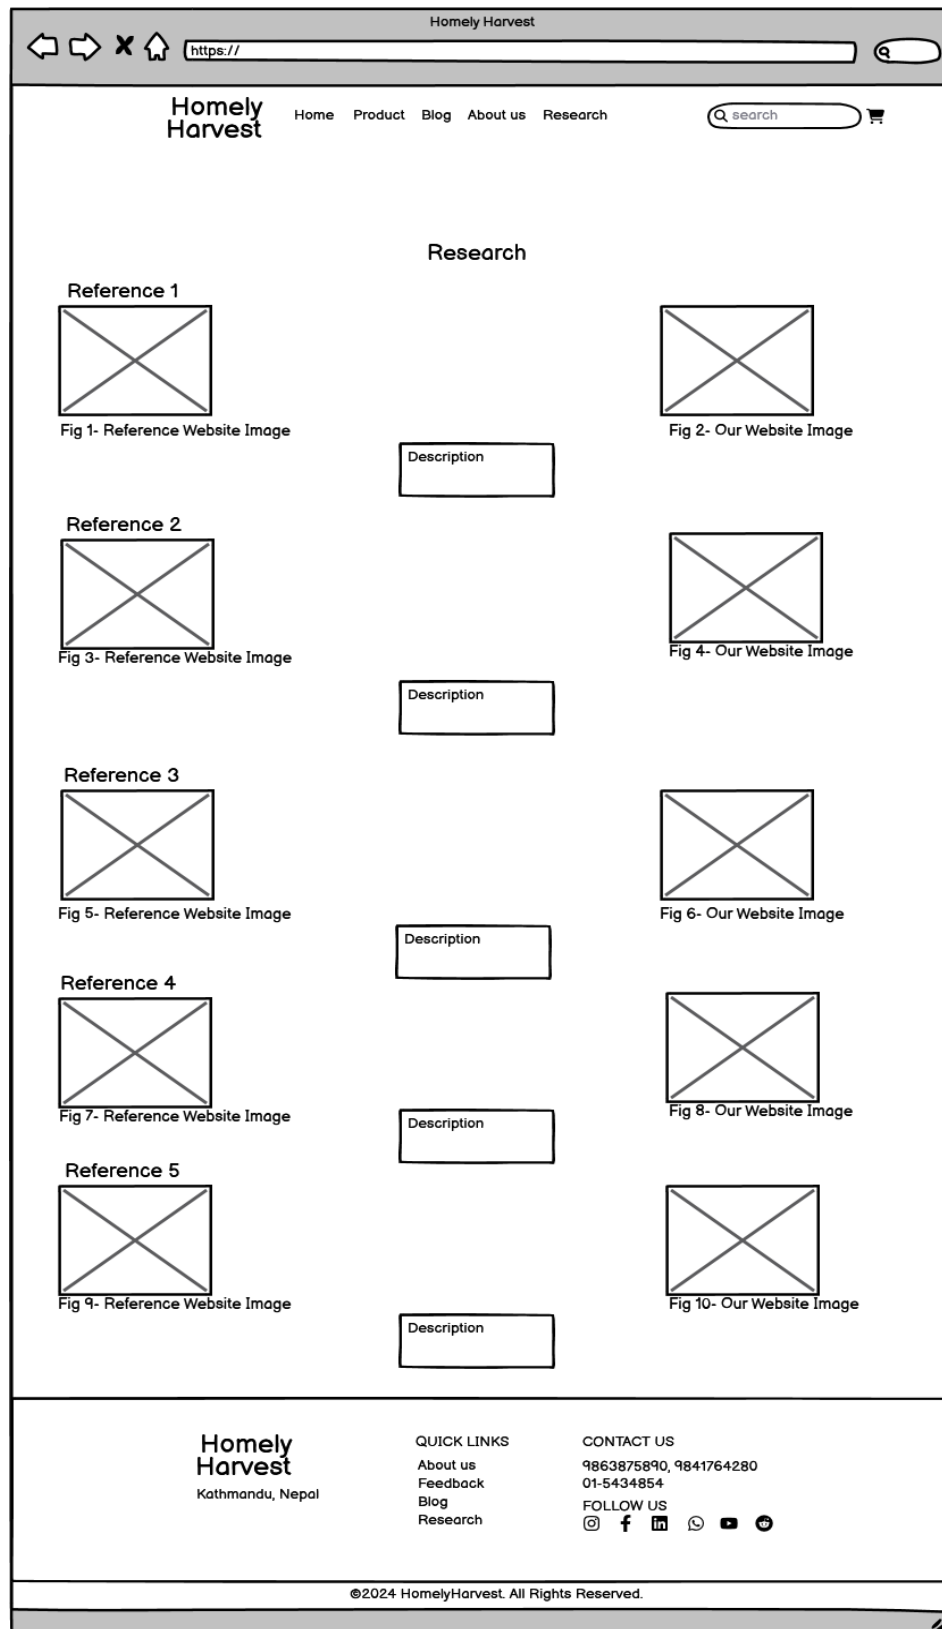

Figure 9: Wireframe of Research page

Rohan Shrestha

3. Testing

Testing is a method to check whether the actual software product matches expected requirements and to ensure that software product is Defect free. The purpose of software testing is to identify errors, gaps or missing requirements in contrast to actual requirements.   (Hamilton,   2024)

3.1. Test 1: Checking the validity of the form

Objective	To show pop off alert message 'Form submitted successfully!'
Action	Following data were filled: First name: LilaRaj Lastname: Dura Contact Number: 9812345982 Review: Your products are so good and fresh and your hospitality. Clicking on the Submit button of the form
Expected Result	Alert message 'Form submitted successfully!' should be shown after clicking the submit button.
Actual Result	Popup alert 'Form submitted successfully!' was shown.
Test	Test case was passed.

Table 1: Test 1: Checking the validity of the form

Rohan Shrestha

Figure 7: Table 1: Adding data to the fields

Figure 8: Table 1: Popup alert was shown

3.2. Test 2: Checking the functionality of the clock

Objective	To check the functionality of the clock in the blog page
Action	Opening blog page
Expected Result	The day, date and time should be shown according to the present time.
Actual Result	The day, date and time was seen according to the present time.
Test	Test case passed

Table 2: Test 2: Checking the functionality of the clock
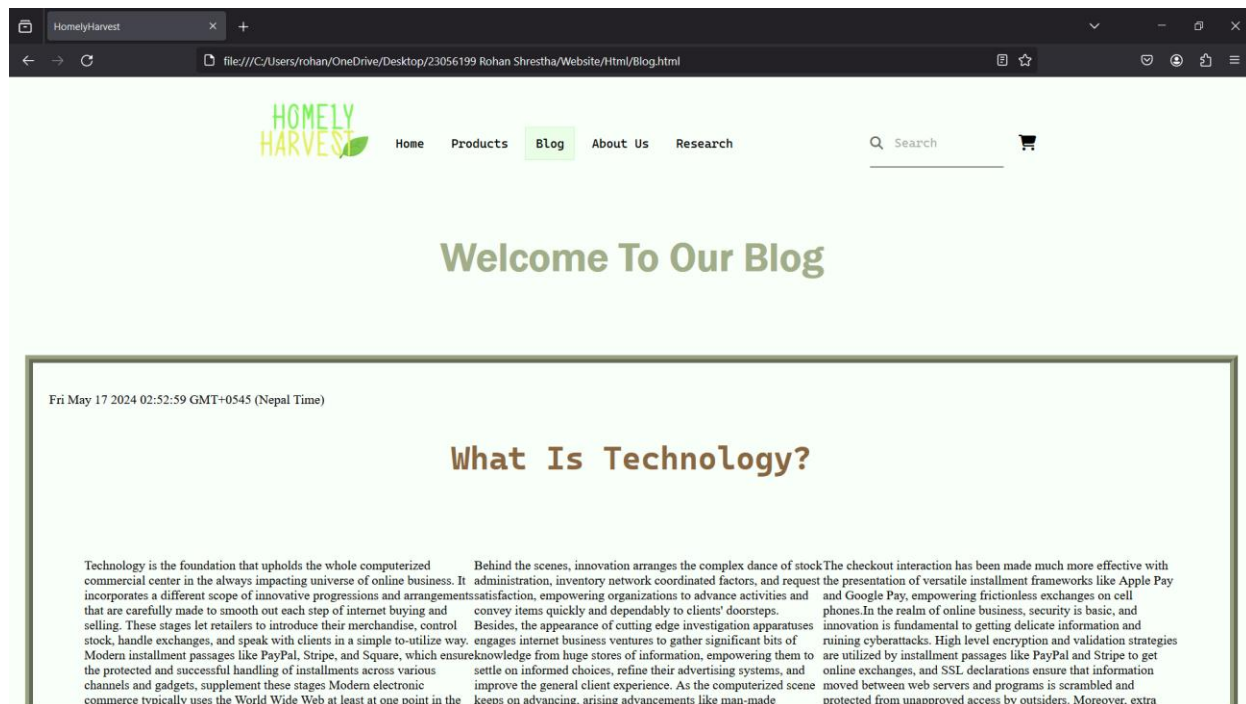

Figure 11: Table 2: Screenshot of observing the date and time

3.3. Test 3: Checking the functionality of image slider

Objective	To check the functionality of the automatic image slider
Action	Opening Homepage
Expected Result	The image on the center of the webpage should change every 3 seconds.
Actual Result	The image was indeed changed every 3 seconds.
Test	Test case passed

Table 3: Test 3: Checking the functionality of image slider
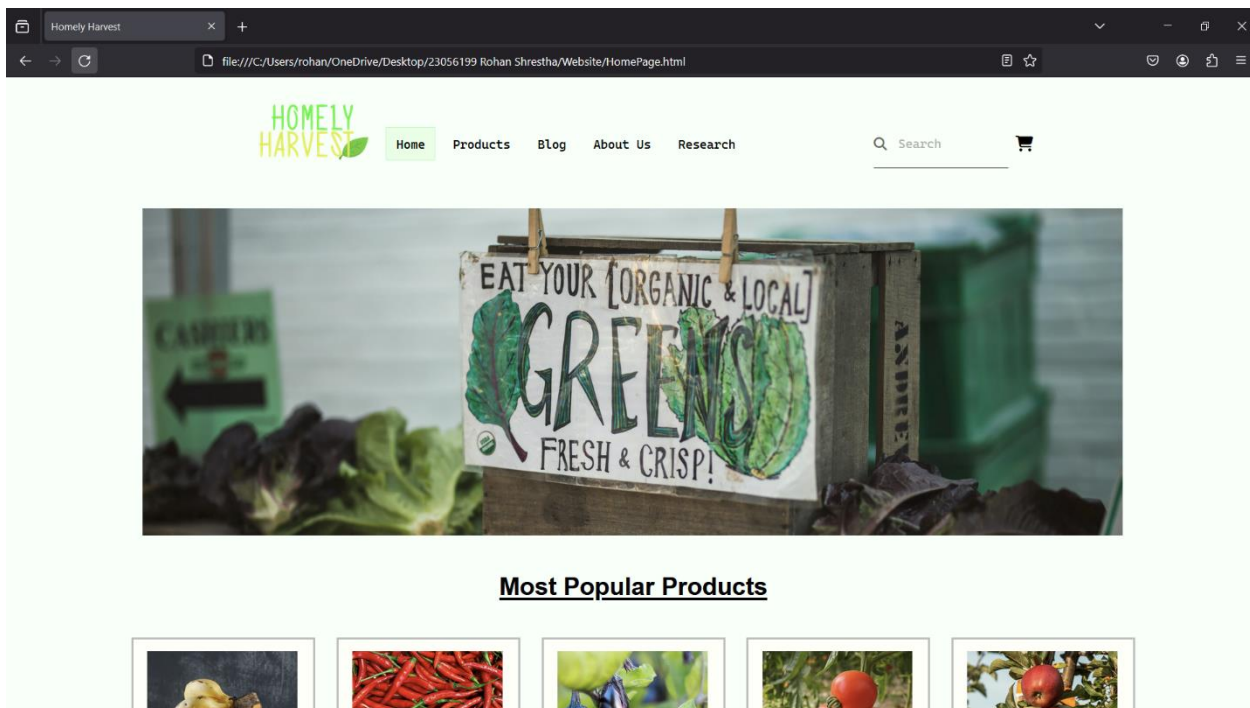

Figure 12: Table 3: Screenshot of web page before the slider image was changed

Rohan Shrestha

Figure 13:: Table 3: Screenshot of web page after the slider image is changed

3.4. Test 4: Checking the functionality of anchor tag's hover effect

Objective	To check the functionality of anchor tag's hover effect.
Action	Opening Homepage Hovering the curser over Product page's anchor tag
Expected Result	The anchor tag of Product page should change its color from black to lime green.
Actual Result	The color of the anchor tag was indeed changed to lime green color.
Test	Test case passed

Table 4: Checking the functionality of anchor tag's hover effect
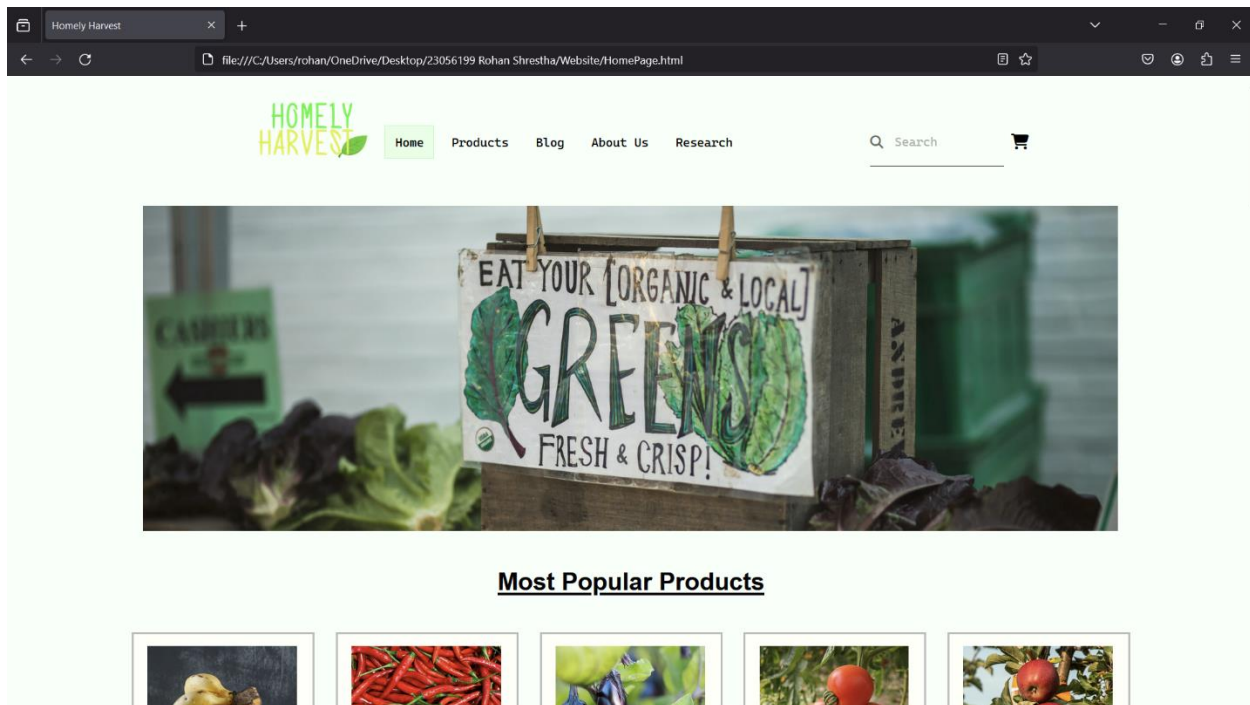

Figure 15: Table 4: Screenshot of before hovering
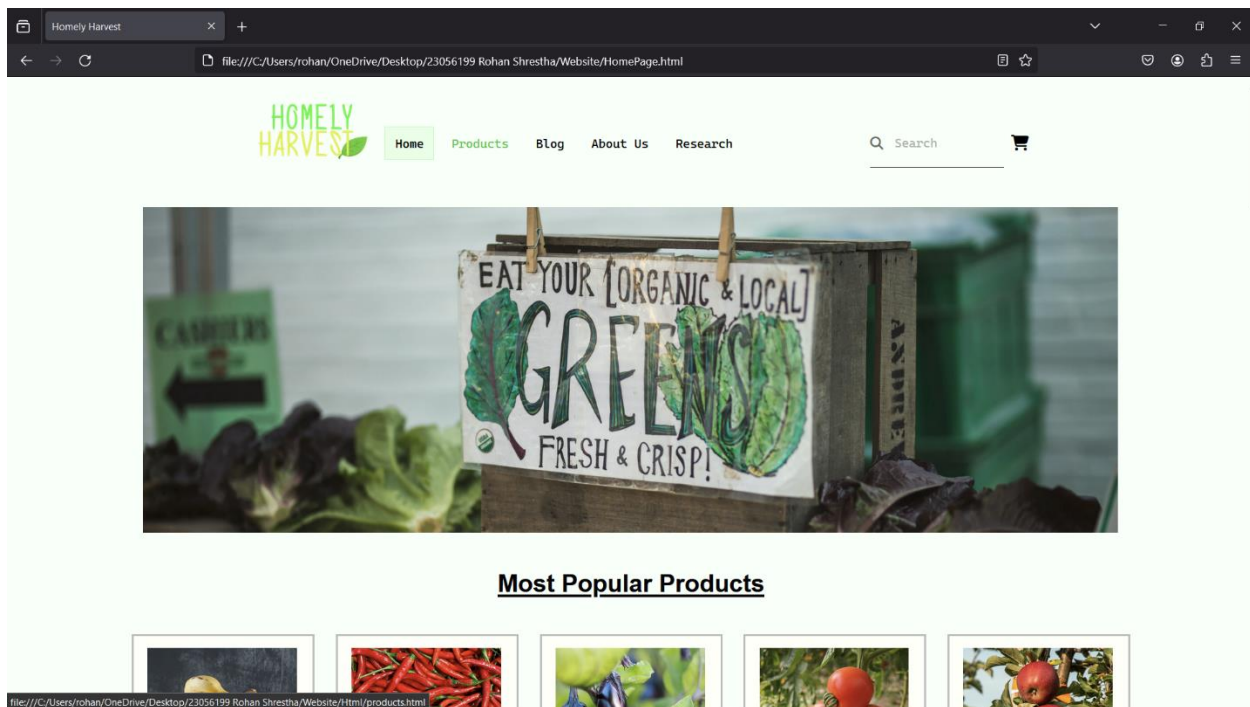

Figure 14: Table 4: Screenshot of after hovering

3.5. Test 5: Checking the functionality of internal and external link of the website

Objective	To check the functionality of internal and external link of the website
Action	Clicking the anchor tag which has internal link. Clicking the anchor tag which has external link
Expected Result	To be redirected to the webpage of internal link. To be redirected to the webpage of external link in different window.
Actual Result	We were indeed redirected to the respective links.
Test	Test case passed

Table 5: Checking the functionality of internal and external link of the website

Figure 16: Table 5: Screenshot of clicking internal link

Rohan Shrestha

Figure 17: Table 5: Screenshot of getting redirect to the internal links website

Figure 18: Table 5: Screenshot of clicking external link

Figure 19: Table 5: Screenshot of getting redirected to the external links website

4. Conclusion

In conclusion, our team has successfully designed and developed a functional website that is visually appealing, and meets the requirements of the coursework. Through teamwork and strong communication, we were able to create a well-defined website. With the help of HTML, CSS, and JavaScript we were able to create a user-friendly website that makes navigation easy and serves its intended purpose as the given requirements. Doing this coursework really helped all the team members to develop new skills in designing and creating a website from scratch using HTML, CSS and JavaScript.

While developing the website, all the team members learned a lot. All the ideas from each member were combined to design a blueprint of the website using Balsamiq Wireframes. After the rough design all the coding was done in Visual Studio Code. Making of the website was not an easy task as we faced many difficulties in various areas. Some of the issues we faced was while creating a visually appealing template and syncing all the web pages with similar theme. The issues we faced, made the entire team to do their own research for solving the problem. Some of the problems were issued to the module tutor who helped in solving them with the best possible way. The problems that were faced also allowed us to expect other possible problems that may occur during developing the website and helped prepare us for other projects in the future.

To conclude, the completion of the website was a great achievement and the hard work that was put into development of the website from all the team members were really satisfying at the end. At last, doing this group coursework helped all the members to gain more knowledge about website development, managing work among the members, etc.

<p>

Technology is the foundation that upholds the whole computerized commercial center in the always impacting universe of online business. It incorporates a different scope of innovative progressions and arrangements that are carefully made to smooth out each step of internet buying and selling. These stages let retailers to introduce their merchandise, control stock, handle exchanges, and speak with clients in a simple to-utilize way. Modern installment passages like PayPal, Stripe, and Square, which ensure the protected and successful handling of installments across various channels and gadgets, supplement these stages

Modern electronic commerce typically uses the World Wide Web at least at one point in the transaction's life-cycle, although it may encompass a wider range of technologies such as e-mail, mobile devices, social media, and telephones as well.

</p>

<p>

Behind the scenes, innovation arranges the complex dance of stock administration, inventory network coordinated factors, and request satisfaction, empowering organizations to advance activities and convey items quickly and dependably to clients' doorsteps. Besides, the appearance of cutting edge investigation apparatuses engages internet business ventures to gather significant bits of knowledge from huge stores of information, empowering them to settle on informed choices, refine their advertising systems, and improve the general client experience. As the computerized scene keeps on advancing, arising advancements like man-made consciousness and AI are progressively being bridled to drive development and productivity inside the internet business environment.

</p>

<p>

The checkout interaction has been made much more effective with the presentation of versatile installment frameworks like Apple Pay and Google Pay,

Rohan Shrestha

empowering frictionless exchanges on cell phones.In the realm of online business, security is basic, and innovation is fundamental to getting delicate information and ruining cyberattacks. High level encryption and validation strategies are utilized by installment passages like PayPal and Stripe to get online exchanges, and SSL declarations ensure that information moved between web servers and programs is scrambled and protected from unapproved access by outsiders. Moreover, extra security layers are added by advancements like tokenization and biometric validation, which support client certainty and confidence in web-based buy.
</p>

<!--section for Positive Impacts Of Technology-->
          <h1 class="heading">Positive Impacts Of Technology</h1>
          <section class="right">

          <p>One can't underscore how much technology has changed web based business; it has totally changed how buyers and firms lead business. The improvement of cutting edge online business stages has given organizations the necessary resources to open web-based stores, which permits them to get to global business sectors and speak with clients anyplace on the planet effortlessly. Due of its openness, little and youngster organizations can now contend on an equivalent premise with notable brands. Technology offers the most comfort since it permits clients to shop, look at, and purchase things at whatever point they need, without being limited by geological limitations or conventional store hours. Moreover, information examination has permitted organizations to redo proposals and purchasing encounters, introducing a time of customized shopping encounters.advancements in light of individual preferences, making more grounded bonds with clients, and expanding brand unwaveringness.
          </p>

Rohan Shrestha

<p>

Technology has changed the functional productivity of internet business ventures, going past simple accommodation. Processes including request handling, client service, and stock administration have been streamlined via computerization and incorporation, which has diminished above and expanded net revenues. Since cloud-based arrangements are adaptable, associations might conform to changing interest without making huge forthright ventures, which advances strength and readiness notwithstanding moving economic situations. Moreover, front line examination advancements give associations basic experiences into rival techniques, industry patterns, and client conduct. These experiences assist them with pursuing information driven choices and remain in front of the opposition.

</p>
<p>

In the realm of online business, security is basic, and innovation is fundamental to getting delicate information and frustrating cyberattacks. High level encryption and validation strategies are utilized by installment entryways like PayPal and Stripe to get online exchanges, and SSL testaments ensure that information moved between web servers and programs is encoded and protected from unapproved access by outsiders. Moreover, extra security layers are added by advancements like tokenization and biometric confirmation, which help client certainty and confidence in web-based buy.

One more significant benefit of online business innovation is proficiency, since robotization and incorporation make many pieces of business activities more proficient. Stock administration frameworks limit manual blunders and augment stock turnover via mechanizing undertakings including request satisfaction, distribution center administration, and stock following. RFID is utilized in production network advancements.

<br>
<!--section for Negative Impacts Of Technology-->
<h1 class="heading">Negative Impacts Of Technology</h1>
<section class="right">
<p>
```

Technology has upset online business, however it likewise accompanies a large group of disadvantages and unfriendly impacts that the two buyers and organizations should know about. The greatest of these concerns is network protection risk in light of the fact that as exchanges become more computerized, there are more open doors for programmers to exploit shortcomings and compromise private data, which can bring about breaks, fraud, and money related misfortunes. Besides, the recurrence of unscrupulous practices, like purchasing counterfeit products and participating in fake exchanges, dissolves client certainty and deprecates online stages. Besides, the advanced gap actually exists, with contrasts in web availability and innovation access disturbing financial disparities and confining underestimated individuals' capacity to take part in the computerized economy.Likewise, web based business' low passage hindrance has filled market immersion and furious contest, making it provoking for more modest organizations to rise out of the shadows and effectively take on additional laid out, greater contenders.

```
</p>
<p>
```

   Dependence on innovation involves gambles too. Organizations are helpless to interruptions like programming bugs, server blackouts, and cyberattacks, which can

Rohan Shrestha

prompt lost income and reputational hurt. Besides, protection issues are a significant issue due to the inescapable social event and usage of client information for designated publicizing, which raises moral worries around information security and shopper security freedoms. Besides, the need for moral strategic policies and administrative control in the online business industry is featured by moral worries about work manhandles, natural impact, and fair rivalry.Finally, while however innovation has made it conceivable to robotize a few areas of client care, it likewise makes it hard to offer individualized and thoughtful help, which could irritate clients and make critical thinking more troublesome. To lay it out plainly, regardless of whether innovation has changed internet business, settling these adverse consequences is fundamental to ensuring a solid, just, and durable computerized commercial center for every interested individual.

</p>
<p>

   Furthermore, the internet business industry's enlivening velocity of mechanical progression has immersed the market and expanded competition, particularly for new companies and little ventures. Because of the low hindrance to section in online business, various organizations rival each other for piece of the pie and client consideration, which stops up business sectors and makes items all the more similar. It very well may be challenging for independent companies to stand apart from the opposition and draw in new clients, which makes it hard to accomplish consistent development. Besides, significant organizations in the web based business space hold a lot of market power. They might control web indexes, dispersion strategies, and costs, which can restrict buyer decision, hinder rivalry, and make it more challenging for new organizations to enter the market.

</p>

Rohan Shrestha

<!--section of Effects Of Technology On Our Lives-->
<h1 class="heading">Effects Of Technology On Our Lives</h1>
<section class="right">

<p>

Our lives have changed significantly because of innovation; online business is only one model. Its belongings are complex, starting effortlessly it gives. Internet business stages have changed the customary retail insight by empowering purchasers to shop whenever, anyplace. Moreover, mechanical headways have disposed of geological limitations, simplifying it for organizations to arrive at an overall customers. This development advances both financial development and culturally diverse exchange by opening up new business sectors and open doors. Innovation likewise makes it feasible for clients to have individualized shopping encounters by utilizing an abundance of information to modify proposals and raise shopper satisfaction.
</p>
<p>

One more distinctive element is productivity, since mechanized innovations improve on everything from installment handling to stock administration. Due to the time and cash reserve funds, web based business is presently a plausible decision for organizations, everything being equal. However, these benefits additionally accompany issues incorporate network safety dangers and stresses over the computerized partition. By the by, regardless of these hindrances, innovation continues prodding advancement, impacting how web based business creates proceeding and changing how we convey and buy in the computerized age.
</p>
<p>

Besides, innovation has totally impacted the way that web based business is cutthroat. Because of the significant decrease in section hindrances, little firms and business people can now effectively send off web-based stores. More modest organizations may now contend on an in any event, battleground with industry goliaths, because of the democratization of trade, which empowers advancement and variety on

Rohan Shrestha

the lookout. Subsequently, clients get to additional choices and reasonable costs. However, this expanded competition likewise implies that organizations need to continually change and improve, which prompts nonstop development in products, administrations, and shopper encounters. Along these lines, the web based business environment continues to grow rapidly because of innovation's ceaseless progressions.

</p>
</section>

<!--section for Conclusion-->
<h1 class="heading">Conclusion</h1>
<section class="right">

<p>

All in all, there is no rejecting that innovation significantly affects web based business, changing how we buy as well as how organizations capability in the contemporary world. Effortlessly of web shopping, a huge number of individuals currently integrate it into their regular schedules, exploiting the unrivaled openness to a broad choice of labor and products with a couple of snaps. This convenience, alongside the overall reach of internet business stages, has totally changed the retail scene by empowering organizations to get to new clients and cross geographic boundaries on a scale never before feasible. Besides, information driven calculations that tweak encounters and proposals to individual inclinations have made it workable for a degree of personalisation that was beforehand unimaginable, expanding buyer joy and unwaveringness.

</p>
<p>

Notwithstanding these benefits, innovation has fundamentally expanded internet business tasks' productivity by smoothing out systems and cutting costs for organizations while additionally giving clients quicker, more consistent shopping encounters. However, there are disadvantages to the development of web based

Rohan Shrestha

business also, for example, stresses over information security, network protection

chances, and the computerized partition. To defeat these hindrances, consistent

meticulousness and monetary help serious areas of strength for conventions and

comprehensive computerized foundation are required.

</p>
<p>

   Notwithstanding, despite these hardships, innovation well affects online business. It

has democratized trade by empowering entrepreneurs and business visionaries to take

on industry titans and by advancing a creative and serious culture that benefits the two

clients and organizations. The fate of online business is significantly better because of

the fast headways in man-made consciousness, expanded reality, and other creating

advancements that can possibly totally change how we connect and buy in the

computerized age. Eventually, innovation has changed how we view business generally

and has reformed internet business, opening the entryway for a more unique and

incorporated worldwide economy.
